

John Adams Institute for Accelerator Science Lecture Series

Thursday 10th March 2016 at 2:30 pm

Dennis Sciama Lecture Theatre, Denys Wilkinson Building

FCC-hh

The lecture will be delivered by

**Daniel Schulte,
CERN**

Abstract:

The lecture will present FCC-hh, the hadron collider of the Future Circular Collider. The conceptual design and basic parameters will be discussed. Key beam dynamics and technology challenges will be highlighted, as well as fundamental design choices. An insight into the increasing R&D programme will be given.
